

# NEXT GENERATION MULTI-PATIENT EVACUATION VEHICLE

**General Truck Body's Next Generation Multi-Patient Vehicles (MPV)** are designed to assist in the response of multiple personnel events due to accident, transfer or recovery of citizens during disaster scenarios. These units can be scaled or customized to cover customer requirements.

**Including but not limited to:**

- The number of patients
- Maneuverability for terrain or city street logistics
- The Multi-Mission capability of the vehicle allows it to be converted to handle litter or ambulatory patients
- Crew accommodations for command, multi-alarm support, and communication operations

## NOTABLE FEATURES:

- Capacity: Upwards of 20 littered patients, 25 seated patients
- Litter arms can be reconfigured or stored based on mission requirements
- Two deployable stretchers
- Option for bariatric stretcher with removable winch (3000 lbs.) at rear
- Each litter position has:
  - Oxygen outlet
  - Electrical outlets with USB
  - Dimmable LED light
- Ability to provide stand-by power for an ambulance strike team (up to 5 ambulances)
- Exterior oxygen storage
  - 3 bottles (Size H) on each side of the unit (total 6 bottles)
  - Easy access to exchange bottles
  - Manifold with low pressure alarm
  - Large digital display inside of the unit to read pressure
- Double door rear body entry/exit, with onboard deployable ramp
- Onboard 30 KW diesel generator mounted to chassis frame below floor
  - Single fuel source from truck chassis fuel tank
  - Below floor containment with sound barrier to reduce interior noise
  - 50 amp & 100 amp shore power plugs
